CHRIS ALLAN DIMLA

IT ENGINEER | SYSTEM SOFTWARE SPECIALIST

Cabuyao City, Laguna, Philippines | +63 936 937 2493 | dimlachris67@gmail.com

PROFESSIONAL SUMMARY

IT Engineer and full-stack systems developer responsible for the integrated HRIS, payroll, timekeeping, biometric, mobile, and AI systems of Hyundai Dongah Joint Venture, serving 3,000+ employees. Builds and maintains 10+ interconnected platforms end to end – from PHP/MySQL web systems and Flutter mobile apps to biometric SDK integrations and a secure on-premise AI assistant – and manages the daily consolidation of attendance data from 20 site biometric devices. Skilled in turning operational requirements into reliable, payroll-sensitive systems, automating Excel/CSV/PDF workflows, resolving production issues, and documenting systems for continuity.

CORE COMPETENCIES

HRIS & Payroll Engineering | PHP/MySQL Full-Stack Development | Flutter Mobile Apps (iOS & Android) | REST APIs & System Integration | Biometric Integration (ZKTeco) | Local AI (Ollama / Qwen) | Data Automation | Production Support

TECHNICAL SKILLS

Backend & Database: PHP, MySQL, SQL, Python, query optimization

Web & Mobile: HTML5, CSS3, JavaScript, AJAX, Bootstrap, Tailwind, Flutter, Dart, React JS, Vite

APIs & Data: REST APIs, Firebase, ZKTeco SDK, VB.NET, Excel/CSV/PDF, Google Apps Script

AI & Security: Ollama, Qwen LLM, PII masking, input sanitization, prompt-injection guardrails, data-at-rest encryption

PROFESSIONAL EXPERIENCE

IT Engineer / Full-Stack Systems Developer

Hyundai Dongah Joint Venture (HDJV) | Human Resources – IT | Jul 17, 2025 – Present

- Primary developer and technical owner of the company's HR-IT systems ecosystem: 10+ interconnected systems for 3,000+ employees, synchronized through shared MySQL databases and PHP APIs across web, mobile, and biometric devices.
- **Stack:** PHP, MySQL, HTML/CSS, JavaScript, AJAX, Tailwind, Bootstrap (web); Flutter/Dart (iOS & Android); VB.NET with biometric SDK; Python, Ollama, Qwen (AI).
- **Production support:** SQL optimization, bug fixing, deployment validation, backups, regression testing, data reconciliation, user support, and system documentation.

Core HR & Payroll Platform

- **Payroll & HR Management System (3,000+ employees)** – Central web platform for employee profiling (active, resigned, terminated, AWOL), contracts, payroll and payroll reports, deductions and loans, HMO, travel allowance, Service Incentive Leave (SIL), holiday and Saturday-off (day-off schedule) setup, memos, and employee messages/concerns. Includes office and site attendance with AWOL and late monitoring.
- **HR Incentive System** – Replaced a manual spreadsheet process by automatically collecting the incentive records of all site employees; integrated directly with the Payroll System.
- **Executive Attendance Dashboard** – Main company dashboard that splits attendance into office and site, with a weekly graph, Direct / Indirect / Staff totals, present vs. absent counts, and total headcount, broken down per department. Exports to Excel and is displayed on the office monitor.

Attendance & Timekeeping Ecosystem

- **Attendance Tracker (Flutter, iOS & Android)** – Employee mobile app for timekeeping, leave, overtime, undertime, payslips, attendance checking, memos, and concern chat, including visibility on whether a filing was submitted and recorded. Synchronized with the Payroll System.
- **Manager Approval System** – Lets managers approve their department's employee filings (synced with the Attendance Tracker) and view their team's attendance, rates, and incident records.

- **Shift Approval** – Timekeepers review and approve shifts filed in the Attendance Tracker (single day, weeks, or months); approved shifts automatically reflect the correct attendance in the app and the Payroll System.
- **Biometric Attendance Automation** – VB.NET application using the biometric device SDK to pull attendance logs directly from the devices with no manual export/import. A PHP API writes the data to the database so records sync globally across the Attendance Tracker, Payroll System, and Manager Approval System.
- **Site Biometric Operations** – Manage and monitor all 20 biometric devices on site, uploading their attendance records to the system every day. Also consolidate attendance sent by site timekeepers' tablet devices via Gmail (retrieved and uploaded to the system), so all records reflect in the Dashboard, Payroll System, and Attendance Tracker.
- **CCTV Attendance Review** – Review CCTV footage to verify employees with missing time-in/time-out, then record the findings in the system so corrections reflect in the Attendance Tracker.

HR Services & Compliance

- **Employee Relations System** – Monitors and records employee incident reports, synchronized with the Manager Approval System so updates are visible on the manager side. Supports spreadsheet-template uploads, shows total record completion and other reports, and exports data in a new reporting format.
- **Clinic Management System** – Serves three company clinics in different locations: imports Google Sheet data and records manual consultations; doctors issue prescriptions in the system; role-based accounts for nurses, doctors, other staff, and admins. Integrated with HR to show Fit-to-Work status, including employees not yet cleared to start work.

AI & Security

- **HDEC-AI (Company AI Assistant)** – On-premise AI assistant built on Ollama and the Qwen model, running on a local server and answering employee questions from the company's own data. Gives dynamic (not static) answers, generates reports, and offers work-related guidance. Secured with a server firewall, folder encryption (data at rest), and a Python backend with PII masking, input sanitization, and prompt-injection guardrails.

Site Timekeeper

Hyundai Dongah Joint Venture (HDJV) | May 10, 2025 – Jul 16, 2025

- Collected, validated, and organized employee attendance and work-hour records; maintained Excel timekeeping masterlists and coordinated record corrections.
- Prepared accurate timekeeping inputs for payroll processing and employee attendance monitoring.

OJT – Site Timekeeper

Hyundai Dongah Joint Venture (HDJV) | Feb 3, 2025 – May 9, 2025

- Assisted with BIR Form 2316 processing and maintained HR files and Excel masterlists.
- Developed practical knowledge of timekeeping, payroll inputs, employee data, and HR workflows that now guides system design and troubleshooting.

EDUCATION

Bachelor of Science in Information Technology

Pamantasan ng Cabuyao | 2018 – 2025
